

MACTAC PROTECT PRO SERIES

**Preserve and protect
your vehicle's paint
with Mactac Protect
Pro Series, available
in Gloss and Matte
finishes.**

Preserve and protect your vehicle's paint with Mactac Protect Pro Series, available in Gloss and Matte finishes. Both films offer durable protection for up to 10 years*, self-healing properties, and an anti-yellowing top coat for a lasting, pristine look.

Mactac Protect Pro Series shields your vehicle from daily wear and tear, and minor scratches fade away thanks to the heat-activated self-healing functionality. The anti-yellowing top coat resists UV radiation and staining, keeping your car looking its best.

The high-gloss finish of the Gloss version provides virtually invisible protection, while the Matte version delivers a sophisticated, sleek matte appearance. Both films offer good slide ability during wet application, supporting precise positioning, and their good conformability and low tack contribute to ease of installation. Available in 1.52 m width and 15.0 m length, both Mactac Protect Pro Gloss and Matte come with a protective sheet on the face layer.

Advantages

Supports preventing paint damage during daily wear and tear

Helps to protect a vehicle's value

Assists in retaining the pristine appearance of a vehicle

Good conformability and low tack contribute to ease of application

Car protection zones

Front and rear bumpers

Wheel arches

Hood

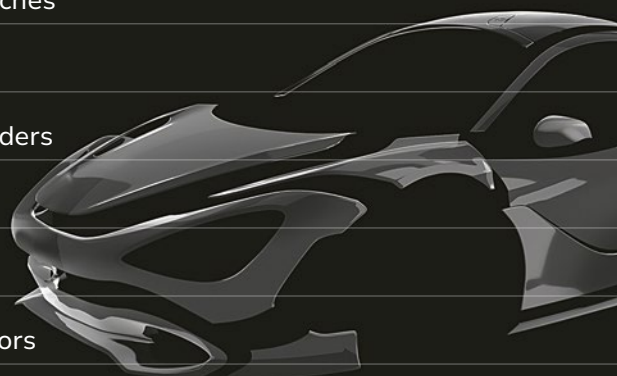

Front fenders

Roof

Doors

Side mirrors

Door sill plates

The Mactac Protect Pro Series is suitable for full or partial vehicle wrapping, especially where stone chips and minor debris are prone to hit the vehicle or other minor impacts are expected — for instance, the roof, hood, or rear from staining from above.
