# Digital Polymeric Overview

## JT and LF 9000 Series

The JT and LF 9000 Series offers three ranges of Mactac digital polymeric and intermediate printing and laminating media - one of the most extensive portfolios in the market, allowing choices from a wide range of finishes, widths and adhesive technologies.

Especially striking, high-resolution print results come as standard, and these products are compatible with most printing technologies: eco-solvent, mild solvent, latex and UV inks. These materials perform well across all 2D applications, and come with 7 to 5 years unprinted durability.

Different needs, different solutions -  
it's all within range
